

## High Batts HDNS trip

Start: 01/11/2017 10:00

End: 01/11/2017 16:00

Observers: Nick Gaunt

Muff Upsall

Jack Upsall

Valerie Holmes

David Holmes

Sonia Starbuck

Kerry Morris

Will Rich

Weather: Cool, overcast but dry, light breeze.

Notes: A field trip for HDNS. We were shown around the reserve by Will Rich. Following the main path, with a detour to the side of the pond (to the annoyance of bird watchers in the hide) where there was some *Syntrichia latifolia* on a stump, we investigated the surrounding woodland, open rough grassland with briar rose and a gravelly calcareous scrape before having lunch in the 'Hotel' riverside hide. Later we worked near the river and then off track to a small waterfall on the edge of the reserve where there were a few semi-aquatic bryophytes.
